## Potatoes in Good Condition

### Agricultural Summary

Temperatures across the state ranged from four to thirteen degrees above normal for the week. North Idaho received the most moisture for the week. Major agricultural activities for the week include caring for livestock, cutting alfalfa, and harvesting legumes and potatoes.

### Soil Moisture and Days Suitable for Fieldwork

Topsoil moisture is at 8% very short, 36% short, 56% adequate, and 0% surplus. Statewide, Idaho farmers had an average of 6.8 days suitable for fieldwork last week.

### Field Crop Report

The dry pea harvest, at ninety-five percent complete, has drawn to a close in most areas of the state. Potato vine dying or killed stage is also ninety five percent and potato harvest is thirty-eight percent complete at the state level. Corn Silage harvest, at twenty-eight percent complete, is well behind the five year average of sixty-eight percent. The Franklin County extension educator commented that warm weather has helped the corn crop mature in that area.
